

Do you agree with the Modern Professional Scientific Intellectuals?

According to modern Professional Scientific Intellectuals:

1. Science never searches for **divisibility**.
2. Science never searches for **comparability**.
3. Science never searches for **connectivity**.
4. Science never searches for **sensitivity**.
5. Science never searches for **transformability**.
6. Science never searches for **substitutability**.
7. Science never searches for **satisfiability**.

Don't laugh at me!

It is the truth about modern science education!
